

Native. Wild. Forever.

Site readiness Check sheet - Forest Creation		Sunny Verma 11.Nov.17
S. No.	Key Checks	Status & Comments (✓ / X / NA / Comments)
1	Sunlight: The site should get sunlight for a minimum period of 8-9 hours in a day.	
2	Underground clearance: No pipes/drains/wires should be present under the afforestation area, to a minimum depth of 1 meter. <i>If pipes, drains, wires etc. are present underground, then they should be clearly marked on the drawing.</i>	
3	Clear the Site: Confirm that the site is clear from waste of any form (debris, metal etc.) and is nothing but an empty space to work.	
4	Soil: Uniform presence of soil beneath the surface to be confirmed. Any presence of construction debris, rock boulders, bricks, inorganic waste, metal scrap etc. to be ruled out. <i>If this cannot be confirmed, then it is to be checked using excavation machine, by digging up to 1.5-2 meters at 5-6 random points across the site.</i>	
5	Water: Watering requirement: 5 Liters/ Sq. Meter/ Day. <i>Confirm presence of water connection, with main line running along the periphery of the site.</i> <i>Confirm connections with hose-pipes(+showers) that can cover the entire site.</i>	
6	Biomass Unloading and Mixing Area: Identify and mark closest possible space to the site. <i>Ensure clear connectivity of this area to 'entry' and 'exit' gates of the <u>property</u>.</i> <i>Identify and mark the path connecting the "Biomass Unloading and Mixing Area" to the forest site.</i>

7	Sapling Unloading and Stocking Area: Identify and mark closest possible space to the site, preferably a shaded area. <i>Ensure clear connectivity of this area to 'entry' and 'exit' gates of the <u>property</u>.</i> <i>This area should have proper water connections for watering of the saplings.</i> <i>Identify and mark the path connecting the "Sapling Unloading and Stocking Area" to the forest site.</i>	
8	Protection: Confirm presence of fence and security, to avoid any possible damage to the site in future from machines, humans or cattle.	
9	Onsite office: Confirm access to a room for Afforestt personnel for discussions, meetings and breaks.	
10	Labor Resting Area: confirm presence of a designated area for the workers to rest and have food and water.	
11	Equipment Storage Room: Confirm presence of a room that can be locked after the end of a work day.	
12	Maintenance Staff: Confirm presence of permanent workers for watering and de-weeding for 2-3 years, and other general maintenance guidelines given by Afforestt.
